Sample meeting minutes

Causing for project discussion
Meeting on monday
Participants: contractor & client
Introduction :
3 main things to do there
1)side project
2)campaign summary
3)create excel file

1 there is code in which you have to change in make it more proper and personalize the code
the code can have same syntax but all the variables used should be different and structure
should be genersize in the you have to format the code extract the details and test. And have to
database in the shrin sai there are different tables there and each table requires some primary
id all the id can be different types id such as a job id

On monday we have to optimize the basic design and want the data to load faster.
